Re: BSE/TSE Statement - Sesqui™ (Sodium Sesquicarbonate)

Dear Valued Customer:

This letter is to confirm that the manufacture of Genesis Alkali Sodium Sesquicarbonate (all grades) is based on the refining of trona, a naturally occurring mineral, and does not contain any bovine products or animal derivatives as part of its origin. Its purity is >99% with trace naturally occurring mineral content.

Therefore, this product would not be at risk for carrying transmissible spongiform encephalopathy (TSE) or Bovine Spongiform Encephalopathy (BSE) materials. This guarantee continues with the product only as long as the product remains in the original unopened container from the Genesis plant in Green River, Wyoming.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads 'Michael Kemmerer'.
