Re: Genesis Alkali Sodium Bicarbonate Continuing Guaranty

Dear Valued Customer:

Approval for use of sodium bicarbonate as a direct food ingredient by the FDA is detailed in the Code of Federal Regulations. The FDA has affirmed Sodium Bicarbonate USP as generally recognized as safe (GRAS) in 21 CFR 184.1736. Genesis Alkali sodium bicarbonate is produced in a cGMP/FSMA compliant facility. Genesis Alkali maintains a FDA food facility (bioterrorism) registration and treats the number as company confidential information.

Genesis sodium bicarbonate USP in bags meets the chemical specifications of the Food Chemicals Codex, Eighth Edition, and the U.S. Pharmacopeia – National Formulary (USP 40-NF 35).

For the purposes of 21 USC Paragraph 303(c)(2) and EC 178/2002; Genesis guarantees that sodium bicarbonate USP is not adulterated or misbranded when shipped. Genesis further guarantees that, as of the date of each shipment, sodium bicarbonate USP may be introduced into interstate commerce under the current provisions of the Act. This guarantee continues with the product only as long as the product remains in the original unopened container from the Genesis plant in Green River, Wyoming.

This Guaranty shall, however, be void and of no effect in any instance where the particular use by you or your customer of any article to which this Guaranty would otherwise apply is a use which is not in accordance with the requirements of the Federal Food, Drug and cosmetic or applicable state law.

This Guaranty shall be a continuing Guaranty and shall continue in effect until such date as you shall receive from Genesis notice of the revocation of the Guaranty contained herein.

Sincerely,

Michael Kemmerer
