Re: **Sodium Bicarbonate Gluten-Free Statement**

Dear Valued Customer:

This letter is to confirm that the manufacture of Genesis Alkali Sodium Bicarbonate (all grades) is based on the refining of trona ore, a naturally occurring mineral. The trona is dissolved, clarified, filtered, and crystallized; then combined with USP grade carbon dioxide to produce Sodium Bicarbonate. Its purity is >99% with trace naturally occurring mineral content. This product is manufactured on a dedicated line inside an isolated building. No part of either the product or processing involves gluten-containing materials.

Please contact me if you have any questions.

Sincerely,

Michael Kemmerer
