Re: **Lot Numbering – Genesis Sodium Hydroxide Solution, 50%**

Dear Valued Customer:

Following is a description of the lot numbering system used by Genesis Alkali at its Green River facility for Sodium Hydroxide Solution, 50%. Each bulk railcar or tank truck receives a lot number as it is filled.

YY-Julian date Example:

17-038, packaged on the 38th day of 2017 (February 7, 2017)

The shipping paper work accompanying the load will have a batch number printed on it. This is an internal Genesis number used in production and marketing tracking. There is no customer usable information built into it.

Please contact me if you have any questions.

Sincerely,

Michael Kemmerer
