Re: **Genesis Alkali Sodium Carbonate - Lot Numbering of Bulk Product**

Dear Valued Customer:

Thank you for your interest in the lot numbering system used by Genesis for Bulk Soda Ash.

Below is the explanation of the lot numbering system used for bulk materials distributed from the Genesis Green River, Wyoming facility. Material trans-loaded elsewhere may follow a different system.

Railcars of sodium carbonate are assigned a lot number that matches the railcar number the material is loaded into. Intermediate bulk containers are assigned a lot number based on the date the material is packaged (Month/Day/Year). Each type of bulk container also receives a 10 digit unique identifier (batch number) which is assigned by and trace-able through our SAP inventory system. This batch number is an internal Genesis Alkali Corporation number used in production and marketing tracking. There is no customer usable information built into it.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink that reads 'Michael Kemmerer'.
