Re: Genesis Alkali Sodium Bicarbonate NSF Certification

Dear Valued Customer:

The Genesis sodium bicarbonate products described below have been tested and certified by the National Sanitation Foundation (NSF) as direct drinking water additives. The products use is for corrosion, pH adjustment, and scale control. NSF's approval may be viewed by going to the NSF web page at www.nsf.org and conducting a search by manufacturers using the name Genesis. The product listing is under Genesis Alkali – Standard 060 – Drinking Water Treatment Chemicals – Health Effects.

Product Grade	Maximum Use Level (MUL) mg/L
USP-FCC and Industrial Grades #1, #2, and #5	100
Coarse Bicarb and #6	100

The certification continues with the product as long as it remains in its original unopened container from the Genesis plant in Green River, Wyoming or the ICS facility in Wilmington, Delaware.

Please contact me if you have any questions.

Sincerely,

Michael Kemmerer
