Re: **Genesis Alkali Sodium Bicarbonate Natural Status**

Dear Valued Customer:

This letter is to confirm that the manufacture of Genesis Sodium Bicarbonate (all grades) is based on the refining of trona, a naturally occurring mineral. No preservatives, flavorings, colors, vitamins, or artificial ingredients of any kind are added to this product. Its purity is >99% with trace naturally occurring mineral content.

While our product is derived from a natural source, it undergoes several processing steps. Since in the market place there is no clear definition of "natural" Genesis has pursued certification of our products with the Organic Materials Review Institute (OMRI). All grades of our Sodium bicarbonate products have been OMRI listed since 2009. Our current sodium bicarbonate OMRI certificates are available on our website.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink that reads 'Michael Kemmerer'.
