**Re: Residual Solvents – Genesis Alkali Sodium Bicarbonate**

Dear Valued Customer:

Genesis affirms that our Sodium Bicarbonate (all grades) complies with ICH-Q3C and USP 40 NF 35 General Chapter <467> residual solvents guidelines. Class 1, Class 2, or Class 3 solvents listed in the International Committee of Harmonization (ICH) are not a part of our manufacturing process.

To confirm that sodium bicarbonate produced at the Green River, Wyoming facility is compliant with current USP/NF general chapter 467 residual solvents guidelines, up to six samples, spread over each year's production, are submitted to an outside laboratory for testing. Over the last year of testing, no solvents were detected above the specification limits.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink that reads 'Michael Kemmerer'.
