Re: **Genesis Alkali Sodium Carbonate – Shelf Life Statement**

Dear Valued Customer:

With regard to the shelf life of Genesis sodium carbonate (Soda Ash – all grades), this product is chemically stable in prolonged storage as long as reasonable care is taken. It is recommended to store product in a cool environment with lower than 50% relative humidity (RH), and to store it away from potential contaminants. No expiration date is required.

For best results with product flow-ability, Genesis recommends that attention be given to storage of bagged sodium carbonate. Ideal storage conditions (cool and dry at less than 50% RH) with pallets stacked two high or less will significantly increase the time before product flow-ability may diminish. Please use your oldest stock first to assure the same high quality product shipped to you is available at the time of product use.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in blue ink that reads 'Michael Kemmerer'.
