**Re: California Proposition 65 Chemicals in Genesis Alkali Sodium Bicarbonate**

Dear Valued Customer:

Genesis has evaluated our product, sodium bicarbonate, for compliance with California's "Safe Drinking Water and Toxics Enforcement Act of 1986" (commonly referred to as Proposition 65). Several sodium bicarbonate samples of various product grades have been evaluated. Results of these tests indicate that exposure to our sodium bicarbonate product does not pose a significant risk of causing cancer or reproductive toxicity.

Even though we are confident no significant risk is present in our product, we are notifying you that the following listed chemicals are contained in our sodium bicarbonate products at a detectable level. This will assist you in evaluating your products and any obligations you may have under the law. Our products shown below contain the indicated concentrations of chemicals listed by California as a chemical known to cause cancer (A) or reproductive toxicity (B). All other Prop 65 listed chemicals are not detected or not suspected to be present.

 **WARNING:** *This product can expose you to chemicals including lead, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).*

Product	Prop 65 Chemical	Concentration (ppm)	Specification (ppm)	Listed Effect
Sodium Bicarbonate	Arsenic, As	< 0.02	1.5	A & B
	Lead, Pb	< 0.15	0.5	A & B
	Nickel, Ni	< 0.25	20	A
	Mercury, Hg	< 0.015	3	B
	Cadmium, Cd	< 0.015	0.5	B

NOTE: Concentration values shown are based on the highest level measured over multiple samples tested.

Please contact me if you have any questions.

Sincerely,

Michael Kemmerer
