

Sodium Bicarbonate: REACH Substances of Very High Concern (SVHC)

This letter is to confirm that the manufacture of Genesis Alkali sodium bicarbonate (all grades) is based on the refining of trona, a naturally occurring mineral. Its purity is >99% with trace naturally occurring mineral content. Specifically, Genesis has reviewed the REACH list of SVHC, and believes that our sodium bicarbonate products do not contain any of these substances at or above the declaration threshold quantity. While we do not test for all SVHC compounds, this statement is made based upon knowledge of our raw materials and process steps.

This confirmation is valid with the product only as long as the product remains in the original unopened container from the Genesis plant in Green River, Wyoming.

Read the product Safety Data Sheet (SDS) prior to using the chemical.
