

Sodium Bicarbonate: Heavy Metals Statement

This letter is to confirm that the manufacture of Genesis sodium bicarbonate (Industrial grade) is based on the refining of trona, a naturally occurring mineral. Its purity is >99% with trace naturally occurring mineral content. No metal catalysts or metal reagents are used in the manufacture of Genesis sodium bicarbonate products.

Heavy metals analysis is performed quarterly on Industrial and TFF grades of sodium bicarbonate. The test is conducted for heavy metals “as Lead”. The metals included in the analysis are: Ag, As, Bi, Cd, Cu, Hg, Pb, Sb, Sn, Mo. It is a “pass/fail” test with a maximum limit of 5 ppm, reported as Lead (Pb). In the history of testing, our product has not failed this test.

Read the product Safety Data Sheet (SDS) prior to using the chemical.
