

Sodium Bicarbonate: Natural Status Statement

This letter is to confirm that the manufacture of Genesis Sodium Bicarbonate (all grades) is based on the refining of trona, a naturally occurring sodium sesquicarbonate mineral. No preservatives, flavorings, colors, vitamins, or artificial ingredients of any kind are added to this product. Its purity is >99% with trace naturally occurring mineral content.

While our product is derived from a natural source, it undergoes several processing steps, including a carbonation step that converts sodium sesquicarbonate to sodium bicarbonate. Since, in the marketplace there is no clear definition of “natural” Genesis has pursued certification of our products with the Organic Materials Review Institute (OMRI). All grades of Genesis Alkali Sodium bicarbonate products have been OMRI listed since 2009. Our current sodium bicarbonate OMRI certificates are available on our [website](#).

Read the product Safety Data Sheet (SDS) prior to using the chemical.
